

NEEJ BUTANI

FULL STACK DEVELOPER & CREATIVE TECHNOLOGIST

Email: neej.butani1603@gmail.com

Location: India

GitHub: github.com/Neej03

LinkedIn: linkedin.com/in/neej-butani

EXECUTIVE SUMMARY

Passionate Full Stack Developer with proven expertise in React, Node.js, JavaScript (ES6+), C++, and modern cloud architectures. Architected and deployed **19+ production-grade web applications**—including AI platforms, data science workspaces, and cybersecurity operation centers—with **18+ live Vercel deployments**. Adept at building high-performance, visually engaging UIs paired with resilient RESTful backend microservices.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, Python, HTML5, CSS3, SQL

Frontend: React.js, Tailwind CSS, Framer Motion, Canvas API, Web Audio API

Backend & APIs: Node.js, Express.js, RESTful APIs, Socket.io, Middleware

Databases & Cloud: MySQL, MongoDB, Firebase, Vercel, Git & GitHub

FEATURED PRODUCTION PROJECTS

1. Nexus Innovation — Central Gateway for AI & Developer Platforms

[Live Demo ↗](#)

Tech: React.js, Node.js, Express.js, Tailwind CSS, Framer Motion, Socket Telemetry

- Engineered an integrated central gateway uniting AI compute telemetry, data science tools, and cloud developer platforms.
- Designed a crimson obsidian dark UI with live socket metrics, workflow node graphs, and sub-100ms API response handling.

2. Nexus Data Science Hub — AI & Machine Learning Playground

[Live Demo ↗](#)

Tech: React.js, Python, FastAPI, Chart.js, Tailwind CSS, Scikit-Learn

- Developed an interactive machine learning playground enabling dataset exploration, model evaluation, and correlation heatmaps.
- Implemented automated statistical summary generators, ROC curve visualizers, and cross-algorithm accuracy matrices.

3. Nexus Cybersecurity Operations — SIEM Threat Defense Center

[Live Demo ↗](#)

Tech: React.js, Node.js, Socket.io, Chart.js, Tailwind CSS

- Designed a Security Operations Center (SOC) dashboard displaying real-time network intrusion alerts and IP threat geolocations.
- Integrated live websocket event streams with threat severity classification and exportable compliance audit reports.

4. Voice of India — Multilingual Cultural Audio & Heritage Archive

[Live Demo ↗](#)

Tech: React.js, Web Audio API, Framer Motion, Tailwind CSS

- Created an audio streaming platform preserving traditional Indian folklore through an interactive regional state map.
- Built custom Web Audio API synthesizer players with real-time waveform visualizers and synchronized transcripts.

ENGINEERING & OPEN SOURCE EXPERIENCE

Full Stack Developer & Open Source Contributor

2023 – Present

Independent Software Engineering & Vercel Deployments

- Architected, built, and deployed 19+ full-stack web applications with 18+ live Vercel production endpoints.
- Designed modular component architectures in React with custom Tailwind CSS design systems and Framer Motion micro-interactions.
- Engineered RESTful backend services in Node.js/Express, implementing JWT authentication, CORS security, and database integration.
- Maintained 20+ open source GitHub repositories with comprehensive README documentation, clean Git history, and CI pipelines.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Engineering

2022 – 2026

University Engineering Curriculum — India

- Core Coursework:** Data Structures & Algorithms (C++), DBMS (MySQL), Operating Systems, Computer Networks, OOP, Software Engineering.

KEY HIGHLIGHTS

 19+ Completed Full Stack Applications

 20+ GitHub Open Source Repositories

 18+ Live Vercel Production Deployments

 Advanced Data Structures in C++
